

A report on the Research Methodology Workshop held at Regional Center for the Quality of Health Care.

Uganda Society for Health Scientists held a research methodology workshop at Regional Center for the Quality of Health Care from 28th to 30th November 2005. Dr. Denise Meya a member of the Executive Board welcomed participants to the workshop. She said that one of the objectives of the Society is to train young researchers. The workshop was the 1st on the calendar year. It will be followed by data analysis. Dr. Denise Meya encouraged members to commit the 3 days if they were to benefit from the workshop.

Expectations of the participants:

- To acquire skills in designing a proposal and data analysis
- To learn more about research methodologies
- To learn more about sampling procedures
- To learn more about making the budget.
- To learn about the systematic way of doing research

The workshop covered introduction to research methods and format of a research proposal, research question and hypothesis formulation, study design, sampling procedure, sample size determination, methodology, data collection methods, data management and data quality control. Dr. Wamuyu Maina, Dr. Moses Kanya, Ms. Tusime Jayne Byakika, and Mr. Simon Kasasa, Dr. Charles Karamaji, Dr. Israel Kalyesubula, Mr. David Mukanga, Dr. Stella Nema and Dr. David Guwatude facilitated the sessions of the workshop.
